### **Event Summary:**

IT Security has been on the rise for the past few years. With new security areas being tapped into, many IT executives face the enormous challenge of keeping hackers away and devising innovative means of preventing such intrusion. This is an area in which IT executives are constantly battling and striving to improve. 2nd Annual SecurAsia Congress 2008 is focusing on IT security issues in various industries from both private and public sector companies in Asia. It basically covers all the latest trends and technologies in IT security in the BFSI (Banks, Finance Service & Insurance), manufacturing, energy and other industries in Asia today. This congress is unique because it has tracks for more industry-specific issues and real-life case studies. The congress structure is made up of a 2 day conference which includes a major exhibition on the latest IT security solutions.
